DSSD CENSUS 2000 PROCEDURES AND OPERATIONS MEMORANDUM #P-5

MEMORANDUM FOR Michael J. Longini
Chief, Decennial Systems and Contracts Management Office

Attention: Dennis Stoudt
Assistant Division Chief for Processing Systems
Decennial Systems and Contracts Management Office

From: Howard Hogan 
Chief, Decennial Statistical Studies Division

Prepared By: Nathan Carter
Decennial Statistical Studies Division

Subject: Request for a File Containing Geocoding Results and Normalized
Files of Questionnaires without a Master Address File ID

The Decennial Statistical Studies Division (DSSD) is evaluating the Census 2000 Be Counted campaign. As part of this evaluation we will be looking to see how the characteristics of the individuals enumerated on Be Counted form (D-10s) that are not included in the census compares to the characteristics of individuals enumerated on D-10s that are included. In order to do this, normalized files of all questionnaires without a Master Address File (MAF) ID is needed. Also a file containing geocoding results is needed, which contains the processing ID and the corresponding MAF ID.

These files are being created by the Decennial Systems and Contracts Management Office (DSCMO) and Geography Division as part of the no-ID questionnaire processing. We request the DSCMO provide the DSSD with these files along with file documentation as they become available. We have been corresponding with George McLaughlin in this regard. Please contact Nathan Carter at x8024 if there are any questions.
